**Attachments:** Figures for the Review of HBWS MWIWP-Comments\_.pdf; rbw\_comments\_HBWS-review of MW-WP.docx

Bob P. et al.,

I failed to get the HBWS review comments out by COB on Friday. But have them to you prior to OOB on Monday. Generally agree with HBWS's comments. Some of my comments got quite lengthy to justify my statements. However, I placed the important points in italics. Hopefully that will be helpful for any response letter you might write.

It seems that much more open minded homework is required on the part of AECOM. Some of the oversights I don't understand since I did give them the bore hole logs for HDMW2253-03, the deviation error for the transient simulations of Rotzoll and El-Kadi, and pointed out during the Nov/Dec scoping meeting that there little to now measureable gradient in the tunnel wells.

Hopefully you will find this review helpful.

Thanks,  
Bob W.

**Subject:** New version of Comment letter for MWIWP

DOH folks,

Please give this letter a careful read. I have included an enclosure that captures the comments that Bob and Mark made on the plan, but I have reworded some of them and I have some questions. You will see a bunch of bold, yellow highlighted comments from me on your comments. I still need to fully digest the BWS comment letter and I need you to do so as well. We may need to revise this letter again to incorporate any BWS comments that we agree with. I can set up a call for early next week to discuss if we need to talk.

Bob
